

Key facts and findings

European innovation partnership supports bottom-up, practical innovation projects

by encouraging cooperation between different stakeholders

(farmers, researchers, agrifood businesses, etc.)

to speed up the introduction and dissemination of innovative practices

2014-2022

€1 billion

EU and national
funds spent

>4 000

projects
supported

What did we find?

A key tool for boosting economic, environmental and social sustainability in agriculture through innovation, but with unrealised potential

Lack of focus on farmers' needs reduced the projects' impact on farming practices

Many of the selected projects had no or little innovation potential

Poor knowledge transfer prevented the wider adoption of innovations
