

Key facts and findings

EU cybersecurity cooperation

Computer Security Incident Response Teams (CSIRTs) and European Cyber Crisis Liaison Organisation Network (EU-CyCLONe)

networks of national experts

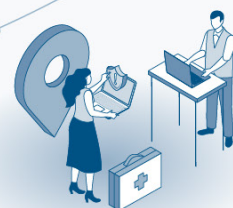

Cyber situation centre

situational awareness support to the European Commission

European Cybersecurity Alert System

network of national and cross-border cyber hubs

EU Cybersecurity Reserve

incident response services by private providers

Digital Europe Programme (2021-2027)

€8.1 billion

€1.4 billion

allocated to **strengthening cybersecurity**

What did we find?

EU action only partially facilitates the detection of and response to significant and large-scale cybersecurity incidents. Improvements are needed to:

enhance information-sharing and avoid overlap of tasks

make the European Cybersecurity Alert System operational

ensure a proper security assessment of entities receiving EU funding

enable adequate progress and performance monitoring
